Step 3 – Once you select the workbook your workbook will be opened.

Borders and Shades in Excel 2010

MS Excel enables you to apply borders to the cells. For applying border, select the range of cells Right Click—> Format cells —>Border Tab—> Select the Border Style. Then you can apply border by Home Tab—> Font group—> Apply Borders.

Apply Shading

You can add shading to the cell from the Home tab—> Font Group—> Select the Color.

Entering excel formulas and formatting data.

⇒ “+”Addition, “-” Subtraction, “*”Multiplication, “/” Division, “^” Exponential

	A	B	C	D	E	F	G
1	Num	Num	Addition	Subtraction	Difference	Division	Exponential
2	20	4	=A2+B2	=A2*B2	=A2-B2	=A2/B2	=A2^2
3	24	6	=A3+B3	=A3*B3	=A3-B3	=A3/B3	=A3^2
4	26	3	=A4+B4	=A4*B4	=A4-B4	=A4/B4	=A4^2

Create the following table and insert the data

No	Name	Sex	Java	C++	Ajax	Min	Max	Sum	Average	rank	grade	status
1	Salui	F	77	66	88							
2	anis	M	55	88	65							
3	Marta	F	77	88	66							
4	John	m	77	66	88							
5	Robert	m	99	78	66							

i. Calculate the following

➔ Min, Max, Sum, Average, Rank

ii. Calculate the grade of a students to reference the box

a. If result >=90, grade=A, If result >=80, grade=B, If result >=70, grade=C, If result >=50, grade=D, if result <50 grade="F".

=IF(K19>=90,"A", IF(K19>=80,"B",IF(K19>=60,"C",IF(K19>=50,"D","F"))))

iii. Give status

If grade is “A”, status=”excellent” if grade is “B”, status=”Good” if grade is “C”

status=”satisfactory” if grade is “D” unsatisfactory and if grade is F status is “fail”.

Filter the data types of filters

- Choose **Data Tab**—> **Filter** to set filter

1. Open a new work sheet and name it Payroll and calculate the following.

A	B	C	D	E	F	G	H
---	---	---	---	---	---	---	---

No	Payroll						
	Name	Work experience	Salary	Bones	Pension	Tax	Net Salary
1	Abebe	5	3756				
2	Almaz	11	899				
3	Aster	13	6734				
4	Alemu	7	2000				

- Calculate the bones by work experience using the following formula.
=IF (work experience >7, 200, IF (work experience <=7,150))
- Calculate the pension 5% of salary: to calculate pension = (salary*0.05).
- Calculate the tax according to the following rule.
 - ✓ If salary >=5000 then tax=salary*35%
 - ✓ If salary >=3500 then tax=salary*30%
 - ✓ If salary >= 2500 then tax=salary*20%
 - ✓ If salary >=1400 then tax=salary*15%
 - ✓ If salary >=150 then tax=salary*10
 - ✓ If salary <150 then tax=salary*0%

=IF(salary >=5000,salary*0.35,IF(salary >=3500, salary*0.30,IF(salary>=2500,salary*0.20,if(salary>=1400,salary*0.15,if(salary>=150, salary*0.10 if salary <150,salary*0))))))

- Calculate the net salary using this formula net salary=salary + bones - (pension + tax). **=salary+bones-(pension+tax)**
