7.	Results dissemination plans.....	18

Acronyms

Acronym	Explanation
---------	-------------

1. Introduction

1.1. Vision and Mission of [organisation managing project]

Briefly give the vision, mission and values of your organisation. The idea is to set the context of why your organisation is involved in the project.

1.2. Background / [for organisation X and project name]

Briefly give an overview of the project (usually the summary from the proposal is sufficient).

1.3. Purpose of the Monitoring & Evaluation Plan

The Monitoring & Evaluation Plan for [project x] has been designed with the following specific objectives in mind:

- Give a few short reasons as to why your organisation should have a monitoring, evaluation and reporting plan. Do not forget Data Quality!

1.4. Brief history of M&E plan development

Stakeholders, Shared vision (internal/external), source and extent of interest/commitment

1.5. Resources, Financial, Human (roles and responsibilities, organizational chart, Infrastructure)

Briefly describe the resources dedicated to M&E. Resources should be comprehensive and cover financial, human, and infrastructure.

1.6. Audience Analysis

Give short introduction as to who the internal and external audience will be for the information you will collect as part of your M and E plan. You can use this table as a guide

2. Project description [organizational / project level]

Problem Statement, Conceptual Framework, Goal and Objectives, Program Description, Interventions, Geographic scope, Target population, Duration

2.1. Problem statement and interventions

The Problem Statement is a description of the health problem your program will address. The Problem Statement clearly identifies the problem that the program will address.

2.2. Conceptual Framework

A conceptual framework provides the theory and assumptions about your interventions. It can be thought of as a theoretical map of a project or plan that sketches the relationship between the different components. Briefly give an overview of your project (from your situational analysis) and a conceptual model showing cause effect relationship (You may include references to support your documentation). Include the areas that are your core concern. Summarize this section by providing the goals and objectives of your program/project.

Example of HIV/AIDS conceptual Framework

Source: T. Boerma, et al 2000.

2.3. Interventions

Interventions, geographic scope, Target population

2.4. Goals and Objectives

Include a statement about the goal and objectives of the program.

Goal: a broad statement of a desired, long-term outcome of the program:

Objectives: statements of desired, specific, realistic and measurable program results:

2.5. Logical or Results Framework

A set of assumptions, concepts, values, and practices that constitutes a way of viewing reality. Developing the framework provides your team with a clear picture of how program activities are linked to expected outputs, outcomes and population-level impacts.

Results Framework

Results frameworks are diagrams that identify steps, or levels, of results, and illustrate the causal relationships linking all levels of a program's objectives.

Elements of a Results Framework

- Goal Statement— **the change in health conditions that we hope to achieve**
- Strategic (or Key) Objective (SO)—**the main result that will help us achieve our goal and for which we can measure change**
- (Intermediate) Results (IRs)—**the things that need to be in place to ensure achievement of the SO**

Strategies & Activities —**what a project does to achieve its intermediate results that contribute to the objective**

3. Performance Monitoring and Evaluation Plan Matrix

Provides detailed information about how the evidence for each result will be collected.

Contents of the PMP Matrix

- Strategic objective and intermediate result
- Detailed definitions of evidence of results [indicators]
- Source, Method, Frequency and Schedule of data collection, M&E team or individuals responsible for data collection
- Tools
- Targets [baseline, planned]
- How data will be reported, reviewed and used to inform decision

4. Results dissemination plans

Section deals with the presentation of the M&E results and dissemination arrangements. The following tool can be used as a guide in the process of preparing this section of the plan.

Activity Results and Dissemination Plan Tool

Activity	Input		Output		Outcome		Impact	
	Period:		Period:		Period:		Period:
