Course Guidebook for Diet Therapy I

1. GENERAL INFORMATION OF THE COURSE

Course Name:	Course Guidebook for Diet Therapy I
Course Code:	HuNu3101
Course Credits Points:	3 hrs.
Contact Hours:	3hrs for lecture and 0 hr. for Lab per week
Course Category:	Major
Status of Course:	Compulsory
Pre-Requisites:	Introduction to Human Nutrition & Nutritional Metabolism
Students' Department:	Human Nutrition
Degree Program:	BSc in Human Nutrition
Students Admission:	Regular
Year of Study:	3 rd year
Semester:	First Semester
Academic Year:	2024/2025
Course Chair:	
Course Instructor name, email, and office location:	Alelign Amare, MPH (Master of Public Health in PHN) Email: alekeku16@gmail.com Office: Agro_ stone 001
Consultation time:	Tuesday morning 3:00 – 5:00 LT Thursday afternoon 8:00-10:00 LT

2. COURSE DESCRIPTION

This course is designed for BSc Human Nutrition students to provide a theoretical and practical base for diet modification and nutritional therapy in health and in a variety of disease states. It equips students with the knowledge, attitudes, and skills required to deliver quality nutritional care for patients in health and illness in their future professional carrier. It also helps students to develop an understanding of nutrition as an integral part of the overall health care system. The course includes basic concepts of diet therapy, factors determining choice of diet for the sick, diet modifications, types of feeding, tools for planning regular and therapeutic diets, overweight and underweight and their management, management of disease of the gastrointestinal system as well as management of common diseases of infancy and early childhood.

3. OBJECTIVES OF THE COURSE

- ❖ The course will teach how to assess various health conditions and develop tailored dietary plans that address the unique needs of individuals, particularly for conditions like diabetes, cardiovascular diseases, and obesity.
- ❖ The course will emphasize the importance of analyzing current research in diet therapy, enabling students to apply evidence-based practices to real-world clinical scenarios.
- ❖ Students will examine the nutritional needs and dietary recommendations for various life stages, including childhood, adulthood, and older age, highlighting the importance of age-specific nutrition.
- ❖ Focuses on understanding the principles of weight control, including the balance of energy intake and expenditure.
- ❖ Explore the role of nutrition in the management of various medical conditions.
- ❖ The course will cover various feeding methods and their applications, including enteral and parenteral nutrition.
- ❖ Students will learn how to identify and implement dietary modifications that promote health, manage chronic diseases, and support overall well-being: use of food substitutions, portion control, and meal planning.
- ❖ Students will learn how to monitor and evaluate the effectiveness of diet therapy interventions over time

4. COURSE LEARNING OUTCOMES (CLO)

At the end of the course, students will be able to:

- 1 Describe the basic concepts of diet therapy.
- 2 Explain factors determining choice of diet for sick and identify types of diet modification for the sick.
- 3 Explain the role of exercise and life style in prevention of non-communicable diseases and investigate dietary problems and provide therapeutic interventions.
- 4 Discuss the application and limitation of different types of feeding: oral, tube, and parenteral feeding
- 5 Develop and implement dietary modification strategies that promote health and manage chronic diseases through practical meal planning and food substitution techniques.
- 6 Evaluate current research in diet therapy and apply evidence-based practices to inform clinical decision-making and improve patient outcomes.
- 7 Plan menus for a healthy person and modify normal diets for people with special needs and medical conditions
- 8 Identify and differentiate between various feeding methods, including enteral and parenteral nutrition, and determine their appropriate application in clinical settings.

5. **INSTRUCTIONAL FORMAT:** Interactive lecture, small group discussion, individual presentation, seminars and practical and following topics (*indicated under Number 6*) will be covered in this course within this semester.

6. Brief list of topics to be covered

Chapter 1: General Introduction to diet therapy

- ✓ Basic principles of diet therapy and dietary management of disease
- ✓ Basic concept of diet therapy and factors determining choice of diet for the sick
- ✓ Food choice and diet planning guide

Chapter 2: Diet Modification

- ✓ Consistency of modified diet

- ✓ Energy and fiber content of modified diet
- ✓ Nutrient density and frequency of feeding

Chapter 3: Types of feeding

- ✓ Enteral feeding
- ✓ Parenteral feeding

Chapter 4: Tools for planning regular and therapeutic diets

- ✓ Composition tables
- ✓ Dietary standards

Chapter 5: Weight management

- ✓ Overweight management
- ✓ Underweight management
- ✓ Role of exercise in weight management

Chapter 6: Medical Nutrition Therapy for Disorders of the Lower Gastrointestinal Tract

- ✓ Common conditions such as irritable bowel syndrome (IBS), inflammatory bowel disease (IBD) (Crohn's disease and ulcerative colitis), diverticulitis, and constipation.
- ✓ Techniques for assessing nutritional status in patients with lower gastrointestinal disorders, including dietary history, anthropometric measurements, and laboratory evaluations.
- ✓ Dietary Management and Medical Nutrition Therapy for Disorders of the Lower GI Tract

Chapter 8. Nutritional management of infancy and early childhood diseases

- ✓ Approaches to prevent and manage obesity in early childhood, emphasizing healthy eating habits and physical activity.
- ✓ Nutritional considerations for children with special needs or medical conditions, such as cystic fibrosis, diabetes, or gastrointestinal disorders.
- ✓ Overview of Nutritional Needs in Infancy and Early Childhood
- ✓ Breastfeeding vs. Formula Feeding and Introduction of Solid Foods
- ✓ Nutritional Management of Allergies

7. ASSESSMENT AND EVALUATION

The course utilizes a variety of continuous assessment and evaluation methods to ensure the achievement of course learning outcomes. These methods include assignments, quizzes, midterm exams, final exams, homework, classwork, presentations, and more. All assignments and tasks must be completed within the specified deadlines.

Home take tasks and, Assignments: Assignments may involve collaborative work for brainstorming and developing general approaches. However, unless specified otherwise, each individual must complete their own submissions. Assignments may entail individual and group components, with equal participation expected from all group members. Students should be prepared since education is an interactive process. Students should be active participants in the teaching-learning process..

Quizzes: Quizzes serve to assess students' current understanding of the coursework.

Mid-term Exam and Final Exam: The exams will be closed book. During the exam, all necessary materials will be provided by the examiner.

8. Assessment type and weight

Assessment type	Mark allotted
Test	5%
Individual assignment 1	10%
Individual assignment 2	10%
Mid exam	25%
Final Exam	50%
Total	100%

9. COURSE POLICY

All students are expected to abide by the code of conduct of students (article 166 and 166.1.1, of the Senate Legislation of Bahir Dar University May 20, 2005) throughout this course. Academic dishonesty, including cheating, fabrication, and plagiarism will not be tolerated and will be reported to concerned bodies for action.

Class attendance and participation: You are expected to **attend** class regularly. If you miss more than 85% of lecture and tutorials and 100% of laboratory class attendance you will not sit for the final exam.

10. GRADING SYSTEM

Raw Mark Interval (100%)	Corresponding Letter Grade	Corresponding Fixed Number Grade
$90 \leq x \leq 100$	A ⁺	4.0
$85 \leq x < 90$	A	4.0
$80 \leq x < 85$	A ⁻	3.75
$75 \leq x < 80$	B ⁺	3.50
$70 \leq x < 75$	B	3.00
$65 \leq x < 70$	B ⁻	2.75
$60 \leq x < 65$	C ⁺	2.50
$50 \leq x < 60$	C	2.00
$45 \leq x < 50$	C ⁻	1.75
$40 \leq x < 45$	D	1.00
$x < 40$	F	0.00
