

BAHIR DAR UNIVERSITY
BAHIR DAR INSTITUTE OF TECHNOLOGY
FACULTY OF CHEMICAL AND FOOD ENGINEERING

Course Title	Introduction to Information & Communication Technologies				
Course Code	Info2041				
Program	BSc. In Human Nutrition				
Module Name	Information Communication Technology				
Module No	HuNu-M1043				
Chair holder	Name				
	Office				
	Mobile		Email		
	Consultation Hrs.				
Instructor/Tutor	Name: Birtukan S.				
	Office: poly block 42 room 03				
	Mobile :		E-mail:birtukan1215@gmail.com		
	Consultation Hrs.				
CP	5(2+3)				
Contact Hours	Lectures	Tutorials	Practical	Home study	Total
	2	-	3	5	
Target Group	Human Nutrition Regular Students				
Year/semester	Year II, Semester I				
Pre-requisite	None				
Status of the Course	Supportive				

Course description

This course is designed to introduce computer basics to students of different backgrounds who will have different responsibilities. A major aim of the course is to provide students with the basic skills to use application software explore the internet and develop their capacity in using the computer technology for facilitating their learning process and corresponding area of engagement. The very intent of the course is to make students understand what computer system is and its components

are, what information is, how information is processed and represented in a computer system and the use of some basic application packages. It is also designed to help students appreciate the use of Information Technology in different organizations and relate the use of this technology to their respective disciplines. The course will finally help students to develop the skills in creating and managing files in a computer system, using application packages and surfing the internet.

Course objectives

At the end of the course, the student will be able to:

- ♣ list and describe the components of a computer system;
- ♣ explain the reasons why we use computers and describe the potential and capabilities of computers;
- ♣ list out main areas of computer applications;
- ♣ explain the history of computer;
- ♣ identify differences between the five generations of computer;
- ♣ explain characteristics of computers;
- ♣ describe different types of computers;
- ♣ describe data representation in computer systems;
- ♣ identify different types of operating systems;
- ♣ create folders to manages files stored in a computer;
- ♣ identify main application packages and develop the skills in using them; and
- ♣ develop the skill to surf the internet.

Schedule of Lecture Topics

Lecture (Hrs.)	Contents	Teachers task	Students task	Reading materials/ resources
3	1. INTRODUCTION TO COMPUTER 1.1. Definition of Computers 1.2. Generations and History Of Computers 1.3. Characteristics and Classifications of Computers 1.4. Applications Areas and Uses of Computers 1.5. Measures of Computer Quality and Performance 1.6. Advantage and Disadvantage Of Computers	Brainstorming Gaped lecture Group discussion Pair discussion Home work	Attending lectures and discussions. Asking and answering questions. Participating in group discussion. Doing class work and homework.	
2	2. BASIC COMPUTER SYSTEM 2.1. Computer Hardware 2.1.1. Input 2.1.2. processer 2.1.3. Out put 2.1.4. Storage 2.1.5. Memory 2.2. Computer Software 2.2.1. Application 2.2.2. software	Brainstorming Gaped lecture Group discussion Pair discussion Home work	Attending lectures and discussions. Asking and answering questions. Participating in group discussion. Doing class work and homework.	
3	3. DATA, INFORMATION, BASICS OF DATA PROCESSING AND DATA REPRESENTATION 3.1. Data Versus Information 3.2. Sources of Information 3.3. Basics of Data Processing 3.4. Data Representation 3.5. Computer Number System and Converting	Brainstorming Gaped lecture Group discussion Pair discussion Home work	Attending lectures and discussions. Asking and answering questions. Participating in group discussion. Doing class work and homework.	
3	4. INTRODUCTION TO NETWORKING AND INTERNET 4.1. Definition of Computer Networks 4.2. Modes of Data Communication 4.3. Types of Computer Networks 4.4. Advantage and Disadvantage of Computer Network 4.5. Network Topology	Brainstorming Gaped lecture Group discussion Pair discussion Home work	Attending lectures and discussions. Asking and answering questions. Participating in group discussion.	

	4.6. Network Devices and Transmission Media 4.7. What Is the Internet?		Doing class work and homework.	
3	5. COMPUTER VIRUS 5.1. Definition of Computer Virus 5.2. Types of Computer Virus 5.3. Symptoms that an Infected Computer Shows 5.4. Prevention Mechanism of Computer Virus	Brainstorming Gaped lecture Group discussion Pair discussion Home work	Attending lectures and discussions. Asking and answering questions. Participating in group discussion. Doing class work and homework.	

Practical work plan

Units	Hours	Conceptual Focus
Ms-windows	5	Desktop components (icons, files and folders, drives, task bar, start menu); windows components (title bar, menu bar, address bar, minimize button, restore/maximize button, close button)
	3	Creating, opening, moving, copying, renaming files and folders Deleting files and folders temporary Deleting and restoring files and from recycle bin
Ms-word	3	Elements of ms-word screen Creating a document using ms-word Saving the created files Opening recently and other existing files
	3	Navigating and scrolling through a document Selection techniques Editing a text (spelling checking, finding synonyms and thesauruses) Coping, moving and deleting a text
	3	Font Formatting (Size, color, font type, font style, underline, bold, italics)
		Paragraph Formatting (Bulleted and numbering, drop cap, alignment of text (center, left, right))
	2	Creating column on any part of a document Inserting Tables, Pictures and Auto shapes
	2	Printing a document Using help for further advanced application of Ms-Word
Ms-Excel	3	Elements of ms-Excel screen Creating workbook Saving the created workbook Opening recently and another existing workbook
	3	Entering and Editing text

		Selection techniques Cell and text Formatting (Size, color, font type, font style, underline, bold, italics) Adding Bulleting and numbering, alignment of text (center, left, right)
	3	Creating border and shading Creating table Cell referencing Creating simple formula
	2	Using built-in functions Copy, cut and using fill handle to copy a formula and deleting a text
	2	Creating and formatting Chart Using help for further advanced application of Ms-Excel
	2	Further practical exercise about word and excel.
Ms -power point	3	Opening ms- PowerPoint Creating presentations Choosing layouts
	3	Changing the color scheme Applying different design templates Creating effects such as animation and slide transitions
Basic ideas about internet	3	What is internet browser? Opening Internet explorer Exploring the internet through internet explorer
	3	Creating e-mail account Sending message Checking inbox

Teaching and learning methods

Mode of delivery of the course includes lecture, discussion, questioning and answering, readings, assignments and presentation, and practical activities.

Assessment Methods and Plan

Evaluation will be carried out based on continuous assessment which accounts 50% and comprises quizzes, tests, assignments, attendances, lab/practical reports and laboratory. The remaining 50% is final exam.

	Assessment methods	Allotted marks in %
	Continuous assessment (quizzes, tests, attendances, assignments, lab/practical etc.)	50
	Final exam	50
	Total	100%
Grading	As per University's legislation

Course Policy

Course Policy

All students are expected to abide by the code of conduct of students (article _____ of The Nationally Harmonized Legislations) throughout this course. Academic dishonesty, including cheating, fabrication, and plagiarism will not be tolerated and will be reported to concerned bodies for action. Class activities will vary day to day, ranging from lectures to writing activities. Students will be active participants in the course. You need to ask questions and raise issues. You are expected to do all the assignments you are supposed to accomplish. You are required to do the assignments provided according to the time table indicated and the Instructor will give out the directions, if necessary.

Note on class attendance and participation: You are expected to attend class regularly and the Instructor will take attendance to ensure that students are coming to class, and if you miss class repeatedly, your grade will be affected. If you miss more than 20% of the class attendance you

will not sit for final exams. Please try to be on time for class. Cell phones MUST be turned off before entering the class as they are disruptive and annoying. So please make sure your cell phone is turned off before entering the class. You are responsible for all class announcements and changes. With regard to class room writing assignments, it is strictly forbidden to write assignment that is irrelevant to the given topic. It is also prohibited that getting other people to write to oneself. If a student tries to write for another student both students will be punished according to the legislation of the university.
